

## Cleanroom Assembly Technician

### Job Description

DCA instruments provides ultra-high vacuum (UHV) equipment for both research and production purposes. Our vision is to be the top company for delivering custom UHV systems that achieve the highest-quality materials for cutting-edge applications. The secret to our success so far is our people.

We are rapidly growing after moving to the new DCA Headquarters, which has more than doubled our production capacity. We are therefore looking for a Cleanroom Assembly Technician to be part of our team. The focus of this role is to assemble ultra-high vacuum components. In this role you will be responsible for identifying and collecting the parts according to the component design, quality checking, and precision assembly. You will also be expected to work alongside other cleanroom technicians collaboratively, sharing cleanroom resources and ensuring the workspace is carefully maintained to ensure a high level of cleanliness.

The ideal candidate will be a highly motivated individual, who is keen to learn new skills and has an interest in technology. Someone who has hands-on experience working with small components or crafts would be advantageous. The candidate will have an eye for precision and the dedication to achieve accuracy with their work, which is key for delivering the high-quality results expected. Previous cleanroom experience is not required, but the ability to practice clean working and good organisation is essential.

### Your responsibilities

- Assemble high-quality components using the cleanroom techniques and tools demonstrated
- Identify parts and ensure the quality and cleanliness matches the required standards.
- Work with the cleanroom team efficiently to ensure tools and facilities are kept in good order
- Demonstrate good work ethic and dedication to the company's goals for delivering the highest-quality products.

### Qualifications

#### Your profile

- High motivation and ability to act independently
- Ability to produce high-quality results
- Previous experience with equipment assembly with small parts or crafts would be a benefit
- Demonstrated team player with a strong motivation to contribute to a positive team culture
- English language would be a plus

## We offer you

- Flexible working conditions
- Extensive training and support for the development of new skills
- An important role in the company that has a big impact on our ability to meet the high expectations of our customers
- DCA employees are supported with lunch, sports, cultural, massage and commuting benefits (Edenred) to improve well-being.
- Private medical care is provided for all employees.
- DCA employees enjoy regular social events (e.g. day cruises) that promote team building across the company departments.
